

I am a listener of K-LOVE (106.7) in Raleigh, NC. I began listening to K-LOVE when I lived in the Raleigh area and I continue to listen to it when I travel back to the area every other week for business. K-LOVE helps me to strengthen my faith through its programming, and that relieves stress, enhances my relationship with God, and generally makes my day. I continue to support K-LOVE because I believe in its mission to provide clean, family oriented Christian programming.

I think that the Raleigh-Durham community would suffer should KLOVE be replaced by an LPFM broadcaster. Chances are good that the LPFM broadcaster would not provide the same clean, family oriented programming that K-LOVE provides. Very few stations are left that provide this type of programming in a way that appeals to both youth and adults, yet it is critical to provide clean programming for those that want to avoid the immoral influences that have corrupted so much of today's contemporary music and radio stations. Howard Stern offers a good example...K-LOVE would never play a Howard Stern broadcast or espouse any of the immoral antics that he performs.

We, the public, need and want the choice of good, clean, family-oriented programming like K-LOVE and some other listener-supported radio stations. Please do not let LPFM interfere with K-LOVE or any of the other existing stations that use FM translators. Thank you!
